

Air Emissions Compliance Without the Headache

Part of the VelocityEHS Environmental Compliance Solution

Compliance with air emissions standards can be a logistical nightmare and an incredible drain on your time and resources.

VelocityEHS Air Emissions software gives you powerful monitoring, analysis and reporting capabilities, without the headaches of other systems' more costly, time-consuming, and consultant-focused implementation models.

Perform complex calculations in real-time; create custom formulas with our unique hybrid calculation engine; generate and submit reports in just a few clicks; and simplify compliance with emissions inventory, GHG reporting requirements, and major air emission source standards — all in one place.

Core Capabilities:

- + CEMS data logging and calculation
- + Hybrid calculation engine
- + Major source emissions compliance, e.g. Title V
- + Customizable and exportable reporting
- + Theoretical emissions modelling, e.g. PTE
